EXAMINER'S AMENDMENT

REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance: The closest prior art is considered to be Shirota et al., Applied Physics Letters, Vol. 65 (7), 15 August 1994 [cited by applicant]. Shirota et al. teaches organic electroluminescent devices comprising double hole transport layers comprised of m-MTDATA and TPD (see page 807, col. 2). Shirota et al. fails to teach a device comprising an elemental metal layer positioned between the two hole transporting layers. The device of present claim 1 is interpreted to require a metal layer formed between two hole transporting material portions. The prior art, either alone or in combination, fails to disclose or to render obvious the very specific metal sub-layer within a hole transporting region as required by the instant claims. Accordingly, claims 1-11 are allowed.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dawn Garrett whose telephone number is 571-272-1523.
